

The Diseases, and Casualties this year being 1632.

A Bortive, and Stillborn .. 445	Grief	11
Affrighted	Jaundies	43
Aged	Jawfalln	8
Ague	Impostume	74
Apoplex, and Meagrom 17	Kil'd by several accidents.. 46	
Bit with a mad dog..... 1	King's Evil.....	38
Bleeding	Lethargie	2
Bloody flux, scowring, and flux	Livergrown	87
..... 148	Lunatique	5
Bruised, Issues, sores, and ulcers,	Made away themselves..... 15	
..... 28	Measles	80
Burnt, and Scalded..... 6	Murthered	7
Burst, and Rupture..... 9	Over-laid, and starved at nurse	7
Cancer, and Wolf..... 10	Palsie	25
Canker	Piles.....	1
Childbed	Plague.....	8
..... 171	Planet	13
Chrisomes, and Infants..... 2268	Pleurisie, and Spleen..... 38	
Cold, and Cough..... 85	Purples, and spotted Fever 38	
Colick, Stone, and Strangury 86	Quinsie	7
Consumption	Rising of the Lights..... 98	
..... 1797	Sciatica	1
Convulsion	Scurvey, and Itch..... 9	
..... 241	Suddenly	62
Cut of the Stone..... 5	Surfet	86
Dead in the street, and starved	Swine Pox	6
..... 6	Teeth	470
Dropsie, and Swelling..... 267	Thrush, and Sore mouth... 40	
Drowned	Tympany	13
..... 34	Tissick	34
Executed, and prest to death 18	Vomiting	1
Falling Sickness..... 7	Worms	27
Fever		
..... 1108		
Fistula		
..... 13		
Flocks, and small Pox..... 631		
French Pox..... 12		
Gangrene		
..... 5		
Gout		
..... 4		

Christened { Males....4994 } Buried { Males....4932 } Whereof, of the
 { Females..4590 } { Females..4603 } of the
 { In all....9584 } { In all....9535 } Plague.8

Increased in the Burials in the 122 Parishes, and at the Pest-house this year..... 993
 Decreased of the Plague in the 122 Parishes, and at the Pest-house this year..... 266 [10]

From these Considerations I have formed the *adjoyned Table*, whose Uses are manifold, and give a more just *Idea* of the *State* and *Condition* of *Mankind*, than any thing yet extant that I know of. It exhibits the *Number* of *People* in the *City* of *Breslaw* of all *Ages*, from the *Birth* to extream *Old Age*, and thereby shews the *Chances* of *Mortality* at all *Ages*, and likewise how to make a certain *Estimate* of the value of *Annuities* for *Lives*, which hitherto has been only done by an *imaginary Valuation*: Also the *Chances* that there are that a *Person* of any *Age* proposed does live to any other *Age* given; with many more, as I shall hereafter shew. This *Table* does shew the *number* of *Persons* that are living in the *Age* current annexed thereto, as follows:

Age	Per- Curt.	Age	Persons										
7		14		21		28		35		42		49	5547
8	1000	15	628	22	586	29	539	36	481	43	4270	50	4584
9	855	16	622	23	579	30	531	37	472	44	4270	51	4584
10	798	17	616	24	573	31	523	38	463	45	3964	52	3964
11	760	18	610	25	567	32	515	39	454	46	3604	53	3604

Table 5.8. Relative frequency distribution of the heights of 9,002 French conscripts from the department of Doubs, 1851-1860.

Height	Relative frequency
Below 4'10"	577
4'10" to 4'11"	637
4'11" to 5'0"	1,116
5'0" to 5'1"	1,766
5'1" to 5'2"	1,457
5'2" to 5'3"	1,777
5'3" to 5'4"	1,313
5'4" to 5'5"	820
5'5" to 5'6"	291
5'6" to 5'7"	153
5'7" to 5'8"	64
5'8" to 5'9"	17
5'9" to 5'10"	9
5'10" to 5'11"	3
	<u>10,000</u>

Source: Bertillon (1863, p. 238).

Note: Livi (1896) found that the apparent drop in the class 5'1" to 5'2" was due to Bertillon's incorrect conversion of measurements grouped by centimeters to measurements grouped by inches.
